

DIFFERENCE  
ENGINE

is an

independent

comics

publisher

based in

Singapore.

A P O T A T O PRODUCTIONS COMPANY

## Publish with us

Difference Engine is inspired by stories from Asia. We are committed to publishing diverse, well-written, and beautifully illustrated comics of all genres.

We would love to work with writers and illustrators, both new and experienced, to contribute to the growing Southeast Asian comics community.

If you have a story to tell, we want to hear from you!

## Experiments

Interactive comics, visual novels, print characters that pop to life with AR – the possibilities are endless. Do you have an out-of-this-world idea? Reach out to us and we'll figure it out together!

## Workshops

Want to make comics? Learn the basics with us! Follow us on social media for public workshops or get in touch for specially crafted sessions. We work with all ages.

## Behind the Name

An encounter with the Difference Engine, a mechanical calculator, led Ada Lovelace down a path she would never look back from. She is now known as the world's first programmer due to her work with Charles Babbage and the Analytical Engine. She defied 19th century conventions and continues to inspire innovators and creators today.

We want the comics we publish at Difference Engine to be a similar catalyst, to nudge readers to look at the world a bit differently. Who knows what they will see?
